Gift Guide for: tech, zen, green friends

If you're looking for something new in your smart phone that is also a little green, check out this really cool snap case.

I opened up the bamboo snap case, and was delighted. I have few friends who are a little more zen than tech, but they still are permanently attached to their iPhone. THIS state of the art snap case is perfect for them.

The Evutec wood snap case is made with real bamboo, but it incorporates Kevlar (yes Kevlar) into its shell. This makes it super light weight and thin, but still protective of your address book, photos, and apps.

**Karbon S** SERIES

Sleek Snap case for iPhone 5/5s

I love the look of the bamboo on the phone, but they also make covers that are just made out of the recycled Kevlar layers that look very urban.

Dual fused layers of DuPont™ Kevlar® Fibers outer shell is 0.7mm thin. Thin, light-weight case with scratch resistant coating. DuPont™ Kevlar® is lightweight and extraordinarily strong, with five times the strength of steel on an equal-weight basis and it does not block your cellular signal.

The Evutec snap cases are available for the iPhone products, including the iPad, as well as Samsung. The best thing is that I can afford these. At only 39.95 MSRP I can buy these for a few friends for Christmas, and get one for myself.

I was not paid for this post. All editorial contest belongs to BusyBeeBlogger.com. I was given product to review.

The logo for Busy Bee, featuring a cartoon bee with blue wings and a yellow and black body, positioned to the left of the words "Busy Bee" written in a large, cursive, blue font.
