Access Control Readers

Rugged smart card readers

These rugged, all weather IP66 rated smart card RFID readers feature stainless steel construction, epoxy encapsulated electronics, audiovisual feedback, and a modern low profile design. These features help reduce the cost of repairs and replacement due to vandalism and harsh environments. Built with Genuine HID Technology, the high frequency iRox reader features iCLASS SE, which can read all HID 13.56 MHz formats. The dual frequency iRoxPlus reader features MultiCLASS SE which adds 125 kHz Proximity for dual frequency applications. *Essex Electronics.*

12G Storage Solution

Two times the increase from 6G Expander

Only available in 12G SAS expander series, LSI DataBolt technology can aggregate bandwidth from 6Gb/s and 3Gb/s hard disk drives and SSD to a 12Gb/s data stream by intelligently buffering data, resulting in over 50 percent increase. DataBolt technology is fully compatible with the 12Gb/s SAS T10 specification. *Sans Digital.*

Hybrid DVR

Easily migrates analog to IP

Speco's HS hybrid DVR was designed specifically as a cost-effective solution to easily migrate existing analog systems to IP. With both 1080p and 960H technology, the HS provides the most optimal image resolutions available today. All (8 or 16) channels are fully configurable for either 960H or IP, and up to 5MP resolution on the last channel. Dual network ports isolate IP camera and remote network traffic, while EZ Wizards make installation a snap. Looping outputs, 2-way audio, Onvif support are all included. *Speco Technologies.*
