✈ Called the world's thinnest Evutec slim wooden iPhone Case

coolelec

Evutec is how to make the thinnest known fashion wooden iPhone protective shell? This is a problem. The company's Karbon S series protective shell, called a slim wooden iPhone Case – only 0.7mm thick. Specific implementations are: The company built a multi-layer wood panels, into a layer of DuPont Kevlar outer build, and includes a removable shock pad layer.

iPhone Case

Traditional wooden protective shell, often easy to remove when broken, but Evutec puts flexibility and durability to an extreme. Of course, the biggest advantage of using wood shell, that is not as blocking signals required Wi-Fi / cellular network / Bluetooth / GPS, etc. as well as metal.

Evutec provide two bamboo and wooden casing for iPhone 5 and 5s, have been sold in the Apple store, the price is \$ 39.95. For iPad mini and fourth generation iPads, users also have Karbon S to choose from.
