## NAB 2014: Marshall Electronics Releases Line of 4K-Compatible Quad-Viewer Monitors

The 17", 24" and 27" Quad-Viewers give users the convenience of a quad-viewer with superior image resolution

By [PVC News Staff](#) | March 31, 2014

Marshall Electronics introduces three new monitors with 4K viewing capability: the QVW-1708 17" 1920 x 1080 Resolution Display, the QVW-2410 24" 1920x1200 Resolution Display and the QVW-2710 27" 2560x1440 Resolution Display. Each monitor has four independent 3G/HD/SD-SDI inputs to enable users to view four channels simultaneously. 4K display, scaled down to the monitor's native resolution, is achieved by using all four inputs simultaneously.

The monitors are ideal for use as on-set critical evaluation monitors, confidence monitors, post production monitors for edit suites, and master control monitors for critical evaluation of program output.

The QVW-1708, QVW-2410 and QVW-2710 Quad-Viewer Monitors feature all-digital TFT-MegaPixel active matrix LCD systems. Three different quad layouts are available, and the side-by-side mode allows any two consecutive channels to be viewed on the screen at one time. In-Monitor Display allows on-screen text and tally indication, controlled locally or remotely via a variety of industry standard protocols.

Marshall Broadcast A/V Division Director of Sales Devan Cress says, "The capabilities of the QVW monitors are unmatched in the market, offering color calibrated 2k/4k quad viewers at outstanding prices. Marshall continues to innovate with the huge range of features available in the QVW displays, allowing users to accomplish more with one monitor."

The On Screen Displays are capable of showing 16 channels of embedded 3G/HD or SDI audio, embedded time code, embedded audio presence indicator and closed caption presence indicator for 608/708 captions. Stereo audio can be monitored for the selected SDI input through a front panel headphone jack. In addition, the monitors allow field calibration via CalMAN™ 5 by SpectraCal, RS-422/485 ports with pass-through as well as the ability to upgrade software and add features in the field via USB upgrade.

The QVW Series is available now. The monitors will be displayed at booth C6019 at the NAB Show.

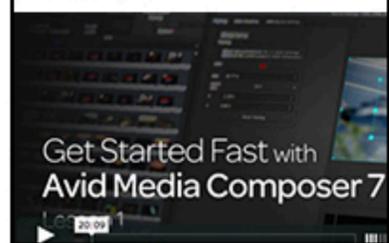

### About Marshall Electronics

Marshall Electronics Inc. is a privately owned American company with four distinct operating units: Professional Audio, Cable/Connector, Optical Systems, and Broadcast/Multimedia Division. Marshall specializes in the development, manufacturing and distribution of high tech electronic products used in a wide range of professional applications. The Broadcast Division of Marshall Electronics supplies high quality LCD monitors, IP security cameras and servers, distribution, and conversion solutions for broadcasters around the world. Visit [www.lcdracks.com](http://www.lcdracks.com) for Marshall's full line of Broadcast products.
